Job Description

Job Title: Software Engineer

Company Overview: XYZ Corp is a leading tech company focused on innovation and excellence. We strive to create cutting-edge solutions that empower businesses and enhance user experiences.

Job Summary: We are seeking a Software Engineer to develop and maintain our web applications. The ideal candidate will have a passion for technology and a desire to work in a collaborative environment.

Key Responsibilities:

- Design, develop, and implement software solutions that meet business needs.
- Collaborate with cross-functional teams to define and design new features.
- Troubleshoot and debug applications to ensure optimal performance.
- Participate in code reviews and contribute to team knowledge sharing.

Required Qualifications:

- Bachelor's degree in Computer Science or a related field.
- 3+ years of experience in software development.
- Proficiency in JavaScript, Python, and SQL.
- Strong understanding of web development technologies and frameworks.

Preferred Qualifications:

- Experience with cloud technologies (AWS, Azure).
- Familiarity with Agile methodologies and version control systems (Git).
- Knowledge of front-end frameworks like React or Angular.

Tech Stack:

- Frontend: HTML, CSS, JavaScript, React
- Backend: Python, Flask, Node.js
- Database: MongoDB, PostgreSQL
- Tools: Git, Docker, Jenkins

Work Environment: This position is remote-friendly with occasional in-office meetings to foster team collaboration.

Salary and Benefits: Competitive salary, comprehensive health insurance, retirement plan, and flexible working hours.

Application Process: To apply, please submit your resume and cover letter to careers@xyzcorp.com.
